

Wares

Wares are the raw and manufactured goods of the X universe. Everything in space is a ware and generally occupies space. There are two properties of cargo:

- **Storage Type:** Defines what ships and station storage modules can carry the ware. Wares are either Solid, Liquid or Container
- **Volume:** The numeric value each unit of the ware takes up in the storage capacity of a ship carrying the ware or station storage module.

The ship or station needs free storage capacity with a value greater or equal to this number to load another unit of the ware.

Name	Minimal Price(Cr.)	Average Price(Cr.)	Maximum Price(Cr.)	Volume (m ³)	Storage Type	Producer	Consumers	Maximum Profit (Cr.)	Maximum profit per volume (Cr./m ³)
