

L - Fedhelm

The Fedhelm is supposedly a dedicated ore miner, though the game only really cares about the cargo bay type and the presence of appropriate mining drones. Therefore like all freighters with Bulk-type storage, the Fedhelm can collect any type of ore as long as the Surface Miner URVs are equipped. It is not a particularly appealing ship for this purpose, though, having the slowest speed of all Bulk mining ships and relatively poor armament, and no particular merit to make up for those flaws.

- Hull: 1200K
- Capital Shield Class: Capital Field Generator Mk1 (x1)
- Component Shield Class: Force Field Projector Mk1
- Speed: 74 m/s
- Storage: 280K (Bulk)
- Drone Capacity: 150
- Weapons:
 - HIT/MA Turret (Argon) x4
 - Mining Turret x1
