

3.50 Beta 2 -> 3.50 Beta 3

Lua/FFI function changes

type	breaking change	note
Lua	GetComponentFactionName()	removed - use FFI GetOwnerDetails()
Lua	GetFactionDetails()	removed - use FFI GetFactionDetails() / Lua GetLibraryEntry()
Lua	GetRelationComponentStatus()	removed - use FFI GetRelationStatus()
Lua	GetRelationFactionStatus()	removed - use FFI GetFactionRelationStatus()
Lua	GetTradeShipList()	changed - removed <i>cargoplanned</i> field, use FFI GetCargoSpaceUsedAfterShoppingList()
FFI	int RelationStatus GetRelationStatus()	changed - return value changed

ui.xml change

To add multi environment support for addons (see  [XRUIMOD-6](#) - Data cannot be retrieved due to an unexpected error) we changed the format of the ui.xml file slightly.

Following describes how to convert the old format to the new format:

ui.xml format <= 3.50 Beta 2

```
<?xml version="1.0" encoding="UTF-8"?>
<addon name="foo" viewtype="detailmonitor"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="../../ui/core/addon.xsd">
  <file name="file1.lua" />
  <file name="file2.lua" />
  <dependency name="foo_dependency" />
  <savedvariable name="foo_MyData" storage="userdata" />
</addon>
```

ui.xml format >= post 3.50 Beta 2

```
<?xml version="1.0" encoding="UTF-8"?>
<addon name="foo" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="../../ui/core/addon.xsd">
  <environment type="detailmonitor">
    <file name="file1.lua" />
    <file name="file2.lua" />
    <dependency name="foo_dependency" />
    <savedvariable name="foo_MyData" storage="userdata" />
  </environment>
</addon>
```
